Summary

I am a highly experienced software developer, infrastructure and platform expert, automation specialist, DevOps engineer, and architect with a passion for cloud development. My areas of expertise are detailed below:

Kubernetes:

- Extensive experience with Kubernetes operators and writing operators in Python, JavaScript/Node.js, and Golang.
- Proficient in working with complex Helm charts, with expertise in writing and maintaining sophisticated and efficient Helm charts.
- Hands-on experience with ArgoCD, Rancher, and cluster orchestration.
- Build cluster automation using Argo-Events.
- Proficient in GitOps practices using ArgoCD for continuous deployment and operational workflows.

Full-stack Development:

- 15 years of experience in .NET, JavaScript, Java, and Scala, including jQuery, AngularJS, and NodeJS development.

Data Management Systems:

- Proficient in ETL and data management systems, having worked with Oracle, MySQL, MS SQL Server, PostgreSQL, MongoDB, Cassandra, and ClickHouse.
- Expertise in building Kubernetes-based data pipelines using ArgoWorkflow.

Ansible and Terraform:

- Highly experienced in using Ansible and Terraform, and writing modules for both.
- Utilized these tools for creating, managing, and deploying infrastructure in a consistent and reproducible manner.

Scripting:

- Possess high-level expertise in scripting languages, with a strong focus on Python and Bash.
- My scripts have helped automate various aspects of development and infrastructure management, increasing efficiency and reducing error.

Cloud Platforms:

- Extensive experience with AWS Cloud, Azure, GCP, DigitalOcean, and Linode-Akamai Cloud.
- Utilized their respective infrastructure as code tools for infrastructure creation, management, and deployment.

Programming Skills:

- Strong programming skills in Java, Python, Go, C#, and JavaScript, enabling me to tackle a wide range of development and automation tasks effectively.
